EDUCATION

Albany State University

Bachelor of Science in Computer Science, Concentration in Mathematics

Albany, GA

Jan. 2022 – May 2025

EXPERIENCE

Data Analytics Intern

August 2024 – December 2024

CDAO, United States Marine Corps

Albany, GA

- Developed a Production Date Prediction Calculator using R, RShiny, and SQL to streamline production scheduling and improve forecasting accuracy
- Utilized Excel for data preprocessing, created interactive dashboards, and collaborated with teams to enhance operational efficiency through data-driven insights

Cloud Engineering Intern

June 2024 – August 2024

Medtronic

Northridge, CA

- Developed and maintained cloud-based applications for diabetes management solutions
- Collaborated with cross-functional teams to integrate SQL databases with front-end applications using React
- Assisted in the optimization of database queries to improve system performance and scalability by using Agile methodologies
- Implemented code for user interfaces and dashboards to visualize data, enhancing user experience and accessibility
- Utilized the SDLC by contributing to code reviews and debugging sessions, ensuring code quality and functionality

Computer Science Research Intern

May 2023– July 2023

University of Central Florida

Orlando, FL

- Chosen from 300 applicants as one of 15 interns to build, test, and present innovative projects
- Conducting research with UCF professors on publishable projects, contributing to academic publications
- Collaborating with professors and mentors to deepen expertise in Ansys, IDAES, and Python

IT Contractor

February 2022 – March 2022

United States Marine Corps

Albany, GA

- Collected and analyzed data on various mechanical systems, providing valuable insights for process improvements
- Enhanced multitasking abilities while efficiently gathering and processing data from multiple sources
- Developed strong teamwork and time management skills, contributing to the successful completion of projects within deadlines
- Proactively participated in team discussions and activities, demonstrating effective communication and leadership in the workplace

PROJECTS

Production Date Prediction Calculator | *R, RShiny, SQL, Microst Excel*

Fall 2024

- Built a Production Date Prediction Calculator using R, RShiny, and SQL, with an interactive interface to streamline manufacturing timelines and forecast production dates
- Utilized Microsoft Excel for data preprocessing and validation, ensuring accurate and reliable predictions.

Financial Advising Website | *HTML, CSS, JavaScript, PHP, SQL*

Fall 2024

- Designed and developed a Financial Advising Website using HTML, CSS, and JavaScript to deliver a user-friendly interface for clients
- Implemented backend functionality with PHP and SQL to manage client data securely and enable dynamic content updates

Store Stock List Updater | *Java, JGrasp*

Fall 2023

- Developed a Store Stock List Updater using Java to automate inventory management and updates
- Utilized jGRASP for coding and debugging to ensure efficient and error-free functionality.

TECHNICAL SKILLS

Languages: Java, Python, SQL, JavaScript, HTML/CSS, R, Visual Basic

Frameworks: React, Node.js, RShiny

Developer Tools: Git, AWS (Amazon Web Services), Bitbucket, VS Code, Visual Studio, PyCharm, RStudio

Libraries: Matplotlib, ggplot2,
